

Maggie Hintz

Middle School
Science Teacher

If you could choose anything to do for a day what would it be?

I would love to sit by a warm fireplace and spend the day knitting. Add in a cup or two of hot cocoa and this sounds like the most relaxing day!

If you could only eat one meal for the rest of your life what would it be?

I love Japanese food! I could happily survive with a bowl of hot ramen soup and sticky white rice every day!

What are your hobbies?

I love to craft (knitting, crocheting and card making are my favorite things to do)! I am also learning how to spin my own yarn for knitting projects. For card making I use a technique called "quilling" which is the art of paper rolling.

If you could live anywhere, where would it be?

This is a tough choice. I would love to spend more time in Japan, but I know I would eventually make my way back to MN. Even though it's cold in the winter, I love the four seasons and the natural resources of this great mid-western state.

What do you love most about your job?

The students, of course! They make me laugh and my job is never boring. The St. Charles community is truly a family and I feel blessed to be a part of it!
